BIOPL 7400 **Spring 2012**

plant biology
the department of plant biology at cornell university

Friday Seminar Series

11:15 AM on Fridays in 404 Plant Science (Whetzel Room) unless indicated otherwise.

SEMINAR DATE	SPEAKER / AFFILIATION	TITLE	HOST
February 10th	Craig Barrett Department of Plant Biology Cornell University	*Host specificity, species delimitation, and chloroplast molecular evolution in a rare, fungus-eating orchid*	Jerrold Davis (jid1)
February 17th	**NO SEMINAR -** Visit Weekend		
February 24th	Cyril Zipfel The Sainsbury Laboratory Norwich Research Park	*Receptor Kinase-mediated Immunity in Plants*	Sorina Popescu (scp78)
March 2nd	Dennis Stevenson New York Botanical Garden	*Cycads: from Field Biology to Neurobiology*	Dead Plant Society Gwynne Lim (gsl47)
March 9th	Erika Edwards Brown University	*A Clade's Eye View of Plant Ecological Adaptation*	Klaas van Wijk (kv35)
March 16th	C. Thomas Philbrick Connecticut State University	*Podostemaceae: A story of endemism, misinformation, phylogeny and taxonomic chaos*	Bill Crepet (wlc1)
March 23rd	**NO SEMINAR –** Spring Break		
March 30th	**NO SEMINAR**		
TUESDAY **April 3rd**	Janet Sprent University of Dundee	*A global view of nodulation and nitrogen fixation in legumes: is there a north south divide?*	Jeff Doyle (jjd5)
April 6th	Harry Klee University of Florida	*The underlying genetics and biochemistry of consumer preferences for tomatoes*	PBGSA Ryan McQuinn (rpm28)
April 13th	Michael Axtell Department of Biology Penn State University	*Evolutionary perspectives on small RNA biogenesis and function in plants*	Adrienne Roeder (ahr75)
April 20th	Marinus Pilon Colorado State University, Fort Collins Department of Biology, Molecular Plant Biology	*Copper Delivery for Photosynthesis in Plants*	Klaas van Wijk (kv35)
April 27th	Hailing Jin University of California Riverside	*Roles of small RNAs and RNAi machinery in plant immunity*	Jian Hua (jh299)

If you have any questions or comments, please contact,
Bill Crepet (wlc1)
